Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Carretti et al. (USPN 2002/008469).

With regard to claim 1,

Carretti et al. disclose a plasma display panel comprising; a plurality of members, one of said members having an exhaust hole for evacuating a chamber formed by said members (paragraph 6, and fig 3a), and, a non-evaporating getter disposed inside the plasma display panel near the exhaust hole (paragraph 9 and 21 of fig 3a).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carretti et al., as applied to claim 1 above, and further in view of Wallace et al. (USPN 5614785).

With regard to claim 2,

Carretti et al. disclose the plasma display panel.

Carretti et al. do not disclose the use of zeolite.

Wallace et al. do disclose the use of zeolite as a non-evaporative getter in a display panel (column 5, lines 5-15), providing an effective, economical getter material.

It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the material of Wallace et al. into the device of Carretti et al. in order to provide an effective, economical getter material.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPN 4306887, 5945780, 6426588, 2002/0151247, 6189579.
